Gentlemen -

I have a collection of the 19th Century Copper Coins complete of the U.S. beginning with 1801 & ending 1900 - I think there is 1 Coin missing - I do not now recall which one, but I have seen it quoted at $1.00. There are however 4 extra ones where there was 2 Coines each year I think - In all then are 103 -

They are nicely preserved - I have them quite nicely mounted which would make them more valuable to some.

Will you kindly give me their value - How do you care to buy them? An early reply would oblige

Yours Truly

H. M. Moore
